Barrel CS

“Barrel” rappresenta una denominazione generale che presenta alcune varianti, a seconda del raggio di curvatura e della grandezza della parte emicilindrica. I differenti attrezzi della stessa famiglia sono: Small Barrel, Step Barrel o Spine Corrector o Half Barrel, Large Barrel o Ladder Barrel e l’ultima nata Swing Barrel.

Barrel CS - La Big Barrel, o Barrel nel gergo corrente, è un attrezzo composto da una struttura portante verticale in acciaio inox, con dei pioli, e una parte in legno, dalla forma emicilindrica, imbottita nella parte superiore. E’ la Barrel con le maggiori dimensioni e con maggiore diametro della parte emicilindrica.

Barrel is the general name which represents different types of this equipment depending on the curved shape and size of the semicircular part. The different tools representing this family are: Small Barrel, Step Barrel or Spine Corrector or Half Barrel, Large Barrel or Big Barrel.

Barrel CS - The Big Barrel or Barrel as insiders like to name it is a training tool made of a vertical structure with wooden bars and a stuffed wooden semicircular part which reminds the form of a lying barrel. It is to note that the Large Barrel has its semicircular part set on a stainless steel “L”-forming structure. The vertical part of this structure resembles a wall bar. The Large Barrel has the biggest dimension with respect to the semicircular part.
